- 
- How well do we know our planet?
  - What are the real causes for our climate crisis?
  - How are the dominant narratives taking us away from finding real solutions?
  - How to recognize truly sustainable solutions against many greenwashing solutions?
  - What are the alternatives available to us?
  - How do we anchor ourselves within the crises?
  - What can we, as individuals, do?

# Why Earth & Us

If you are grappling with these questions, know deep down that something is fundamentally wrong with our current systems and want to delve deeper into alternative narratives, this course will change many of your perspectives.

# About the course

## **Session 1:**

- What is ecology and why should we study the subject
- Basics of ecological studies
- How did humans reach where we are now

## **Session 2:**

- The missing narratives on climate change
- Impact of climate change on different communities
- Understanding the current economic paradigm of growth

## **Session 3:**

- What is true sustainability
- Identifying sustainable solutions amongst greenwashing

## **Session 4:**

- Alternatives across the world
- Indigenous knowledge systems and their relevance now
- Self inquiry and anchoring in the times of polycrises

# Course details

The course includes four live online sessions and an assignment that participants will have to present to complete the course. The sessions are interactive with fun nature-based and other creative activities, and provides a safe non-judgmental platform to discuss issues, thoughts, and observations. The participants will be provided with various resources and book/film recommendations that will add tremendous value while taking decisions in professional and personal lives.

**28th November, 2024:** Ecology  
**29th November, 2024:** Climate change  
**5th December, 2024:** Sustainability  
**6th December, 2024:** Alternatives  
**7th December, 2024:** Assignment submission

Weekdays - 5:00 PM -7:30 PM  
(including time for Q & A)  
Weekends - 10:30 AM-1:00 PM  
(including time for Q&A)

# What participants said

"If you're wondering what's up with climate change and sustainability, this course is exactly what you are looking for! Mani and Bipasha take you on eye opening journey that makes you take a hard look at not only the outside world but also yourself" ~S. Aitwani

"I found this course and its resources helpful as it provides a more rooted and diverse approach to the current understanding of climate crisis, bringing in not just the economics of it but also the eco-centric, historical, indigenous and spiritual perspectives together. It also instills a sense of questioning about the current narratives, the way things are and urges us to ask questions, sit with them and reflect at the end of every section" ~ Shreya

"This course is an eye-opener and makes us realize the truth of this world. What is going on and how can we make it a better place for us to live in. Please attend and make the most out of it"  
~ Aitijhya M

"Unlearning, questioning and understanding the intensity of the issue"  
~ participant
