

# SADHANA VILLAGE SCHOOL

Inviting applications

## Learning Un Learning

exploring cognition and re-cognizing the being

An experiential and collaborative enquiry/ course on exploring how one learns, how learning happens in nature What nature learns  
And why nature learns.....

### Who

Sadhana village school team & initiative for re imagining schools is offering their space to understand children and to reclaim the natural learning process

### Why

The present schooling is stressful for children and at the same time kills their sensitivity, creativity and intuitive abilities. Understanding this deeply would help the participant regain their own creativity and would be helpful to the children in the process

### For whom

Any one interested- no age bar- parents, teachers or any one interested in creativity, children, nature...

### Duration / Where

The program is being planned as an year long one, in which ten days of each month will be at the **Sadhana village school premises** and the rest of the month for independent exploration at various selected locations. Participants can either join for the year long program or can choose which ever month is convinient.

### Process

The Program would be assisted by the Sadhana team but the participant is expected to take the total responsibility. First step being to work on oneself to reclaim natural learning with assistance from children, nature & some reading . So exploring the self is the center of all activities keeping objectivity as the check point.

### Medium-

Language is not much of a bar as each participant will have to learn on their own. How ever the team at Sadhana knows Marathi, Hindi, English , Kanada, Tamil, Malayalam, Gujrathi etc

### Questions to be held

Senses and its role in cognition, Biological roots of knowledge and knowing, What is the purpose of learning and what is one supposed to learn

### Reading matter

History of modern schooling, Politics of knowledge, Ivan Illich, Claude Anthropological studies on learning, Culture and cognition, Recent researches in cognitive and related sciences., learning in experiential, literate and digital conditions, .Cognitive damages of modern schooling.

### Important dates

Application to reach by 31st December 2013.

Session to commence on 20th January 2014

## Starting in jan 2014
